year students, over the two days the students take part in a variety of activities to achieve the goals of the event. Some of the highlights of this year's camps were a 5 minute skit written and acted out by each team.

Another highlight was the mini research seminar where the second year students do poster presentations of their research carried out in their presentation class. This year showcased some of the best research ever seen in the immersion camp with research topics including invasive species, the future of nuclear energy in Japan, and endangered species. Debates were also a highlight of this year's immersion camp, where different teams have to debate various social topics with teams awarded points based on the critical thinking, evidence and English used.

Finally, this year we were fortunate enough to have a guest lecturer, Dr Subir Kumar Biswas from Kyoto University who gave a scintillating lecture on his research into sustainable technology. The second year students found this an insightful lecture that exemplified real world challenges facing world-class research into achieving sustainable solutions. All the teachers had a great time being involved in the organization of the event and are very proud of the achievements of all the students. The teachers are already looking forward to the planning of next year's Immersion Camp!

Table For Two (TFT)

Table For Two (TFT) is a program of the World Wide Learning (WWL) Institution for a Global Society. It is a program that aims to provide a high-quality education for all students, regardless of their background or ability.

The program is designed to be a comprehensive and holistic education that prepares students for the challenges of the 21st century. It focuses on developing the students' critical thinking, problem-solving, and communication skills, as well as their social and emotional intelligence. The program is also designed to be flexible and adaptable to the needs of individual students.
